## SUMMARY

Software Engineering student with a strong interest in front-end development, UI/UX design, and problem-solving. Proficient in HTML, CSS, JavaScript, and fundamental programming concepts, with hands-on experience building responsive and interactive web applications. Passionate about creating clean, user-centered digital experiences and applying logical thinking to real-world problems. Continuously developing technical skills through personal projects and self-learning, with a strong motivation to contribute to professional development teams and gain industry-level internship experience.

## LANGUAGES

amharic ●●●●●

English ●●●○○

## SKILLS

**Technical Skills And soft skill**

- C++
- Python
- JavaScript
- HTML
- CSS
- MySQL
- Git
- GitHub
- Visual Studio Code
- Google Stitch
- Data Structures & Algorithms
- UI/UX Design
- Responsive Web Design

Soft Skills

- Problem Solving
- Critical Thinking
- Communication
- Teamwork
- Active Learning
- Time Management
- Adaptability

## PROJECTS

**1. 🚦 Adaptive Traffic Management System (C++)**
Collaborated with a team to build a smart traffic control simulation system using C++. Developed adaptive signal logic based on real-time vehicle density with emergency prioritization. Integrated auto/manual modes plus SQLite and file logging for data storage and analysis.
https://github.com/a-r-s-e-m-a/ADAPTIVE-TRAFFIC-MANAGEMENT-SYSTEM.git

**2. 🍛 DishDecide** :-Ethiopian Meal Picker (HTML, CSS, JavaScript)
Built a responsive web app that helps students quickly choose meals based on time and dietary preference. Created a system that filters meals (Lunch/Dinner, Tsom/Non-Tsom) and generates random Ethiopian dish suggestions. Designed a simple mobile-friendly UI and deployed the project on Vercel for public access.
Live Demo: https://dish-decide-application.vercel.app/
